Port Adapters

- Add a valve directly to the port best suited for sampling
- Choose from a wide range of BSPP, BSPT, SAE, NPTF and metric thread adapters
- Standardize on one valve thread and add to an adapter with a common -4 SAE ORB port connection

Overview

To Install
Use 2 wrenches when assembling and disassembling. Always torque to the thread closest to the port first. Selecting the proper torque ensures a long trouble free service life.

Sealing Guide

- Form A: DIN O-ring (Metric)
- Form B: Flat Seal (Metric, BSPP)
- Form C: Recessed Seal (Metric, BSPP)
- Form D: Tapered Seal (NPT, BSPT)
- Form E: ISO 6149 O-Ring (ORB, Metric SAE J1926)

To Order:
When ordering the valve assembled to the adapter, indicate the valve series first then the adapter thread next (i.e. KST2GC). Be sure to specify if viton is required and sealing type if necessary. When ordering the adapter alone use 4UF followed by the adapter thread size (i.e. 4UF-2GC)
