FLEX - Product Overview

perma FLEX: has what you need

Adjustable discharge period 1-12 months

Can be adjusted and switched off even after activation.

Your benefit: Less maintenance costs due to longer equipment service life and increased equipment availability.

User friendly all-in-one system

perma FLEX comes fully assembled and can be activated quickly and easily without tools.

Your benefit: No difficult, time consuming assembly, no special tools required. Just unpack, turn switch and the system is ready.

Temperature flexibility from -4°F to 140°F

For use in hot and cold areas and applications with changing temperatures.

Your benefit: You need only one system for a variety of applications.

Well protected

perma FLEX is IP 68 certified and offers excellent protection against dirt and water.

Your benefit: perma FLEX can be used in extremely moist or dusty areas.

perma FLEX: everything you need to get the job done

Customized lubricants

perma FLEX can be filled with grease and oil. Check out our extensive standard lubricant assortment for the lubricant you need.

Your benefit: You will get a lubrication system filled with a lubricant that meets all requirements of your application. In case you cannot find a special lubricant that you need, please contact us.

Accessories and more

Most of our competitors just sell lubrication systems. Our service does not stop there. We offer all connecting parts and accessories you need for installation. And, we will help you if you have a special lubrication problem.

Your benefit: A one stop service partner. Instead of having to deal with many different suppliers you can easily order all parts at perma. All parts are tested and are guaranteed to be compatible. This saves you stress, time and money.
