

ReliaMAX[™] Automatic Lubrication System

This is one of five trucks recently purchased by the City of Holyoke Massachusetts.

All trucks, ranging from two trash/recycling trucks, to a dump truck with a sander and wing plow had our [ReliaMAX[™] automatic lubrication systems](#) installed on them.

When asked what the justification was for investing in the systems, Mr. Glen Sisson, garage Superintendent stated the following:

- 1: There is no availability of time to service the trucks during the work day and the city/union will not entertain a second shift
2. There is an insufficient number of spare trucks on hand
3. Cannot guarantee it will be greased in a timely fashion due to inadequate manpower
4. Frees up available manpower to maintain older trucks
5. Like having a mechanic riding on the truck and greasing it while it works\ROI easy to justify and is essentially a no brainer- was easy to sell the board when purchasing these 5 new trucks
